1. About Flip Card

Flip Card is a premium CV(Resume)/Online Business Card animated website template. This template is perfect to use for small websites. It can be used as a CV/Portfolio Template, Landing Page, or any website with a little number of pages.

2. Flip Card Files & Folders Structure

Flip Card files are located in the **flipcard/** folder from the downloaded archive:

- css: folder with a .css files
- i: here you can find layouts images and icons used in this Template.
- **includes**: here are php files with "send-email" and "send-message" scripts.
- **font**: this folder contains Roboto font in different formats for different browsers.
- js: JavaScript scripts used in this template
- prettyphoto: contains files that are required for Pretty Photo Popup Library
- and the main **index.html** in the root folder

3. Installation

To install Flip Card template you have to copy all files & folders from the **flipcard/** folder to your website root folder on the server (It could be a real server or local testing server).

4. Template Configuration

Flip Card configuration is located in the beginning of **js/flipcard.js** file. You can enable/disable rotating background and to define arrows labels:

```
/* Template Configuration */
fc = {
    //Enable/Disable rotating background lights
    rotateLights : true,

    //Duration per circle in ms
    lightsDuration : 15000,

    //Arrow labels
```

5. HTML Structure

Let's look at HTML structure of Flip Card. Open index.html file:

5.1 Main Layout

```

                        </div>
                    <div class="clearfix"></div>
                </div>
            </div>
```

```
</div>
                                                                         Card
        <div class="arrow arrow-tr"><a href=""></a></div>
                                                                        navigation
        <div class="arrow arrow-bl"><a href=""></a></div>
                                                                        arrows
    </div>
    <!-- Scripts -->
    <script src="//ajax.googleapis.com/ajax/libs/jquery/1.8.1/jquery.min.js">/
script>
    <script>window.jQuery || document.write('<script src="js/vendor/</pre>
jquery-1.8.1.min.js"><\/script>')</script>
    <script src="js/plugins.js"></script>
    <script src="js/flipcard.js"></script>
                                                       Template's JavaScripts
</body>
</html>
```

Let's look at some "blocks" more closely:

5.2 CSS Files

There are five CSS files used in this Template. You can find css attachment in the HEAD section of index.html file. By default they are located in the css/ folder. You can easily change the path or filename in the href attribute of LINK tag.

style.css - this file contains all general layouts for the template. It is separated into different sections. If you would like to edit a specific section of the site, simply find the appropriate section in the CSS file, and then scroll down until you find the appropriate style that needs to be edited.

responsive.css - this file contains styles modification for different screen resolutions.

jscrollpane.css - this file contains styles to stylize custom scroll bar

prettyPhoto.css - this file contains styles for Pretty Photo popup window

5.3 Skills

Let's look at Skills' structure more closely:

```
<div class="skill" data-skill="70">Photoshop</div>
<div class="skill" data-skill="90">Dreamweaver</div>
<div class="skill" data-skill="20">Flash</div>
```

As you may see it is pretty simple. The point is that you need to specify your percentage skill knowledge in "data-skill" attribute of DIV with a "skill" class.

5.4 Portfolio

To add new portfolio item you need to use the following HTML layout inside of Portfolio page:

As you can see to make it work you need to add **rel="prettyPhoto"** attribute to link's A tag to make the popup work and to specify full image inside of HREF attribute.

If you want to use portfolio item with video then use:

In this case you need to add additional "video-item" class to portfolio item DIV. Also you need to specify link to Vimeo or Youtube video inside of HREF attribute of link tag.

5.5 JavaScripts

Flip Card template uses 4 JavaScript files

Attachment of JavaScript files can be found in the HEAD section and in the end of index.php file:

```
<script src="js/vendor/modernizr-2.6.2.min.js"></script>
<script src="//ajax.googleapis.com/ajax/libs/jquery/1.8.1/jquery.min.js"></script>
<script>window.jQuery || document.write('<script src="js/vendor/
jquery-1.8.1.min.js"><\/script>')</script>
<script src="js/plugins.js"></script>
<script src="js/plugins.js"></script>
<script src="js/flipcard.js"></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></scr
```

modernizr-2.6.2.min.js - Modernizr is an open-source JavaScript library that helps you build the next generation of HTML5 and CSS3-powered websites. More information can be found at http://modernizr.com/

jquery-1.8.1.min.js - jQuery is a fast and concise JavaScript Library that simplifies HTML document traversing, event handling, animating, and Ajax interactions for rapid web development. More information can be found at http://jquery.com/

plugins.js - script with JS plugins like Pretty Photo and jScrollPane that are used in this template.

flipcard.js - is the custom script used for template configuration, animation, effects and Ajax requests. You can learn more about jQuery methods used here (fadeOut(), fadeIn(), fadeTo(), animate(), jQuery.get(), html(), delay(), hover() etc.) by visiting this jQuery Documentation Site.

6. Color Themes

Flip Card comes with 4 color variations - orange, black, blue and white. To change color theme all you need is to change class of BODY element:

<body class="orange">

<body class="blue">

<body class="black">

7. Ajax Contact From

HTML content of the Contact form is located inside of contacts tab in index.html file:

After you click on the "Send" button script will check all required fields (email) and if everything is correct it will send Ajax request to php script which will send email message to the specified e-mail address.

Let's look at this script more closely. It is located in includes/send-message.php:

```
<?php
if (isset($ GET['email'])) $email = $ GET['email'];
else {
      header('Location: ../');
      exit();
if (isset($ GET['message'])) $message = $ GET['message'];
$subject = "Message From FlipCard Template"; //change message subject to yours
$mail to = "demo@idangero.us"; //change this email to yours
$message = stripslashes($message);
$headers = "From: <".$email.">\r\n";
$headers .= "Reply-To: ".$email."\r\n";
$headers .= "X-Mailer: PHPMailer"."\r\n";
$headers .= "Content-Type: text/plain; charset=\"utf-8\"";
if (mail($mail_to, $subject, $message, $headers)) {
?>
<!-- The following message will be inserted instead of form if the mail will be
successfully sent -->
Thanks! Your message has been successfully sent!
<?php
      }
else {
<!-- The following message will be inserted instead of form if the mail will not
be sent -->
Error Occurred! Try again later.
<?php
     }
2>
```

8. PSD Files & Structure

There are one layered **psd** files comes with the **Flip Card** template. You can locate it into **psd/** folder form the downloaded archive. Using this file you can easily redesign template and every its element, or to create your own color theme. To edit it file you'll need an Adobe™ Photoshop™ (Recommended is CS5 or higher version)

Here is **flipcard.psd** file.

All layers in this file are well organized and easy to understand and redesign.

9. Licensing Terms

Regular License (RL)

RL gives you as a customer non-exclusive & non-transferable right to use the product you've bought, in this case is the **Flip Card** (further "**Item**")

- 1. We do not limit the number of **Item**'s copies you are going to use. Using one **Item** you can create, for example, even 100 web-sites.
- 2. You can use the **Item** by itself or it's also possible to apply it in other project you work at.
- 3. You can use the **Item** for your own purpose as well as for your clients.
- 4. You can use the **Item** in commercial projects.
- 5. You can reproduce the **Item**:
- on a web-site or as a web-site
- as a part of software you create not for sale

- as a printed variant
- in digital(electronic) format (as a presentation or an e-book)
- in video products
- 6. All photos used on iDangero.us for demonstration photo gallery functioning are our private property (if only there is nothing said about contrary). It's prohibited to use these photos wherever.
- 7. You are not allowed to sell, resell, license or give the **Item** free (any way) without our written consent. Please, do not offer to do it to any person.
- 8. You also do not have the right to use the **Item** in a project for selling (for example, for other templates, scripts, graphics and so on).
- 9. It's prohibited to rework / redesign / reproduce the **Item** (i.e.to rename it or change graphics & so on) and after this to sell it as your own.
- 10. In spite of reselling limitation you could claim money for the **Item** from your client.
- 11. If the **Item** (the whole **Item** or its parts) is created with materials used by GNU General Public License (GPL) (or some other license) it means you should follow all the terms of the license using the **Item**.
